

*This is the belt for the skirt. It's kedar should be held snugly into the center inside channel of the upright. It should be stationary so that you can blouse the leg skirt around it.*

*Insert this kedar into the btm. of the upright. You will have to insert it before you insert the kedar from the leg skirt into that same channel. You must insert these into the upright before you hang the skirt in the upper channels. This is on the outside of the belt.*
